RAYCOM
SPECIAL WHITE

Lively and vivid white, not monotonous! The White color, even in its simplicity, hides endless possibilities. The masterbatches SPECIAL WHITE by Gaypa are synonymous of high efficiency. Being the object of closed attention at our laboratories, they differ from classic formulations in their technical performance.

SPECIAL WHITE

These color masterbatches meet both aesthetic and high technical requirements, ensuring optimal opacity and maximizing the effectiveness of your production process. Furthermore, Special White's recipes also protect valuable machinery by preserving the main components from abrasion. This feature makes them versatile and suitable for use in any industry. In fact, the ethical choice of selecting quality raw materials from Gaypa allows them to embrace a wide range of requirements and to work alongside companies on markets with more stringent regulations, such as the food contact in Europe and the USA.

In Gaypa, one production line is entirely dedicated to our white colors. This allows for better management of product effects and avoids contamination with other materials, ensuring high color purity.

* Any QA specifications agreed with customers are disclosed in individual data sheets.
