PART 1 OF 4

ULTRA VIOLET

A GLIMPSE INTO THE FUTURE.

Intense shades and metallic reflections evoke the world of technology, constantly evolving to allow us to dream of new spaces and opportunities. From the earliest space explorations to expeditions beyond the boundaries of our Solar System, humankind has always longed to discover what lies "beyond."

Prod. No. 26-02347

STARRY BLUE

THE FIRST STARS OF DUSK.

Small dots in the sky that slowly begin to appear, hinting at a peaceful night. This color becomes a canvas, representing, in a nuance, a moment of peace and tranquility: an escape from the hustle and bustle of everyday life, in the instant when everything begins to slow down.

Prod. No.. 26-02343

MILKY WAY

GLIMMERS OF LIGHT IN THE NIGHT.

The Milky Way is the galaxy in which our Solar System is immersed. It is our home. Since the dawn of time, the stars that inhabit it have guided humanity so that we do not lose our way. It reminds us to have hope: it is precisely in the darkest hour that the stars shine their brightest. In fact, the deeper the darkness, the more intense the light whose splendor is exalted.

Prod. No.: 26-02344

STARDUST YELLOW

MAKE A WISH.

The word desire comes from Latin, from the union of the particle de-: absence, distance and sidus: star, astro. Literally, "lack of stars." To desire therefore means to look up and experience an intense yearning for something that is missing. A feeling that drives us to seek the inspiration capable of filling that void.

Prod. No.. 26-02345

CLUSTER RED

IN A GALAXY FAR (FAR AWAY).

Star clusters are dense groups of stars, interacting with each other, bound together by the force of gravity. Together, they wander through the vastness of the universe. Their presence offers us a breathtaking spectacle, "staining" the sky with light and inspiring nostalgic shades and unexpected combinations.
